

SAFARI NJEMA NEWS 4th FOR 2009

Dear Friends and Clients,

The last safari of the year had ended with a big bang. Dr Jim Hunter from Greenville South Carolina took the opportunity to come and hunt for Elephant and Lion and everything else that was on offer. The main species Elephant and lion. Well if you are lucky then you are a made man. On the 2^{de} day Jim shot this magnificent Elephant and on the 7th day the very old lion. Dr Jim was shooting Barnes xxx bullets and all the animals' shot were one-shot kills.

We had a near miss with a hippo bull when hunting buffalo it came out of the long grass as I told my friend Lee Foster "hippo on land will almost always charge" I shot it 4 meters from me many think it is a long distance but if you are in front it is right on top of you.

I have secured a very good hunting block in the Selous again for next year. With very good elephant at the end of the season It is excellent for leopard and one would have a 95% chance to hunt one. I still have open dates for next year so please contact me at piet@safarinjema.com

Dr Jim Hunter and his Hippo The Sleeping elephant tusks 2m long

That was a good day

Buffalo is always fun

The Roosevelt sable

2 Two feet of angry lion - scary

The 500 to the rescue only a brain shot will stop them

Gold medal east African kudu

The buffalo behind the hippo

Best regards
